Coronation Com. Submits Report of The Faunds

Here A Balance After Paying All Expenses

The final meeting of the Coronation Committee was held on Monday evening June 7th. In the judging of the pictures taken of the celebration on May 12th the committee placed the such as parade, acrobatic exhibitions into various groups. Hilarious, floats, may-pole dance and from the best pictures in these groups selected the final winners. As the pictures were all numbered, the awards were made in the following order: First Prize \$10.00 Dutton, Second Prize No 6 Miss I Cox, Third Prize No 4 F Soukup.

Winners are asked to bring negatives to be left with the secretary treasurer as property of the Coronation Committee. Orders for copies of the winning pictures may be left with the Red Cross executive.

The following statement gives receipts and expenditures in connection with the celebration: The balance of \$101.09 is being held until June 12th in order to meet any contingent liability. A outstanding after which date it will be handed over to the Redcliff branch of the Red Cross Society. Of the balance twenty dollars has been requested paid over to the Swimming Pool Committee by the Red Cross, to enable all Redcliff children to have advantage of the pool facilities, who might otherwise be unable to do so.

A dance will be held at Lake Valley on Friday evening of this week.

At a meeting held in Winnipeg last week Paul F. Bradet of Kenner was elected president of the Canadian Whist 2. C. Brouillette.

The terrific dust storm which swept over western districts last Wednesday and which hit here in the evening, blew out or buried two thirds of the growing crop and destroyed miles of fences in the Excel district.

Danish Tennis Court is Big Improvement

Is Now Surrounded With Trees And Hedges

Members of the Danish Tennis Club have made a big improvement on their court this spring. The grounds have been nicely leveled up, removed the weeds and surrounded the court with young maple trees and a caragana hedge. On one side a semi-circle rocky has been laid in which a wicker bench has been built.

Officers are taking a keen interest in the grounds. There is no doubt it will be a beauty spot this summer and will be well patronized by members of the club.

E. L. Gray, Brooks Elected Leader of The Liberar Party

Willing to Co-Operate with Other Parties for Same Government

At the liberal convention held in Calgary last week, Mr. E. L. Gray was chosen as leader of the party for Alberta.

At present Mr. Gray is a resident of Brooks where he is manager of the Eastern Irrigation District.

The newly elected leader joined the staff of Clarholm school of Agriculture in 1925 and two years later joined the Department of Agriculture of Alberta. Three years later he was promoted to the position of provincial field crop commissioner and in 1934 became deputy minister of municipal affairs for Alberta under the U. F. A. administration. He resigned in 1935 after the Alberta government took office.

After his election as leader Mr. Gray stated he planned a conference in the near future to form a united front and stand ready to confer with Conservatives, C. F. A. and other parties in seeking a plan for same government for Alberta.

Mr. Duggan, leader of the provincial Conservative party has agreed to enter a conference to form a united front as he had advocated this month ago.

R. G. Reid former U. F. A. premier and E. E. Roper, prominent in the Co-Operative Commonwealth, refused to comment on the proposition but were prepared to discuss the proposals with Mr. Gray.

R. L. Borden

Sir R. L. Borden, distinguished statesman, who was Prime Minister of Canada throughout the Great War, died this morning after three weeks' illness. He would have been 83 years of age on the 20th of this month. To the War Veterans of Canada, to whom he always gave an attentive ear, he was known as the "Grand Old Man." The late Mr. Borden was Premier of Canada from 1911 until June 10th, 1920, when he resigned the leadership. He was then head of the Union Government.

Alta. Legislature Again Adjourned Until June 14th

Was Done To Give Time To Confer With Mr. Powell

The adjourned meeting of the local legislature met last Tuesday and after a short session adjourned again till June 14th to give the Alberta cabinet and the Social Credit Board time to confer with G. F. Powell, secretary of Major Dourds.

The house could have adjourned at any time before but the Premier's consent to the motion which was unanimous approval. He forced Premier Aberhart to give 24 hours notice, claiming he did it as a gesture of impartiality with the government's lack of legislative action.

Mr. Powell will advise the Social Creditors what to do with their budget which was laid.

Says Wheat Board Will Soon Pass Out

Ottawa Correspondents Say It Is No Secret

Newspaper reporters from Ottawa reported that the wheat board will be discontinued at the end of the crop year. Chester Bloor, Ottawa correspondent of the Winnipeg Free Press, wrote on May 28th:

"It is no secret in official circles at Ottawa that the days of the Dominion Wheat Board are numbered. While the government must necessarily await the report of the Turgeon Commission, expected late in July or early in August, there is not a slightest ground to anticipate anything else than the abolition of a painful experiment of holding Canadian wheat for higher prices."

Mr. G. H. Worts is at present in the hospital suffering from blood poisoning which resulted from a small cut in his hand which he got when butchering. He underwent an operation to-day.

Girls Soft Ball Game Here Last Sunday

Visitors Won Double Header But Were Close

Girls soft ball season was opened here last Sunday when a double header exhibition game was played with the Rockets against Medicine Hat.

The visitors won both games, after a close and exciting but the score was very close in both games 10-8 and 9-7.

The battery for the visitors was D. Green Fisher and J. Johnson and Kathleen Fulton and June Mallard for Redcliff in the afternoon game. In the evening "Ginger" Tonks and "Soap" Johnson for the visitors and Marjory Fairhurst and June Mallard for the home team.

The batteries in both games put on a splendid exhibition and were largely responsible for keeping the score down.

Despite the first game of the season both teams put up a single play ball and there is no doubt that games in the future will be well worth seeing.

Jens Gallagher for the visitors and Marjory Fairhurst for Redcliff both knocked out home runs.

Arrangements are being made for a league with Medicine Hat and Redcliff and the school will be drawn up in the near future.

Committee to Investigate Cost For Road Work

Is Claimed That The Most Costly Went To Contractors

An inquiry into the operation of the provincial department of public works will be held before the public accounts committee. It appears there is reason to believe that some excessive prices had been charged for road work between Wetaskiwin and Edmonton during the past year. While this work was being done to provide work for the unemployed the greatest part of the money spent is thought to have been handed over to the contractors instead of to the day-laborers.

Mr. G. H. Worts is at present in the hospital suffering from blood poisoning which resulted from a small cut in his hand which he got when butchering. He underwent an operation to-day.

Dates Set For the Medicine Hat Annual Stampede

Three Days Program Starts Wednesday June 23

Bills are out now announcing the annual Stampede to be held at Medicine Hat on Wednesday, Thursday and Friday June 23, 24 and 25.

A splendid three day program has been arranged for afternoons and evenings each day.

Besides a full line of stampede events, there will also be various horse races for all of which prizes amounting to \$3,000 have been allotted.

There will also be ferris wheels, merry-go-rounds, mix-up three side shows, ten amusement concessions and special entertainment for children. Night platform attractions have also been arranged.

The Calgary "Blue Bonnet" Girls Pipe Band will be in attendance and Highland dancing will be performed on the platform.

There is assured a full three days entertainment and amusement.

Mrs. Newton arrived this week to visit her daughter, Mrs. A. R. Ballantyne.

P. Campeau & Son now have a fine new covered car for delivering their goods.

Unfavorable crop reports and export demands raised wheat prices 3 to 4 cents last Tuesday.

In the general election in B. C. the Social Credit Party polled 291 votes out of 405,000.

On Saturday evening, June 19th there will be a dance at Bray Lake School.

Hon. J. G. Gardiner, federal Minister of Agriculture, has assured a delegation from Medicine Hat that he will visit this district in either July or August in order to personally acquaint himself with water conservation conditions in this district.

Mr. G. F. Powell, English assessor here with Major Douglas, arrived here with G. I. MacLellan, chairman of the C. C. board. Mr. Powell said Doug is promised if enough unity of purpose was found in Alberta, he would come to Canada.

DARING RIDERS AT THE CRYSTAL PALACE

A. H. Norton and his passenger thrilled round Standard Road at the Crystal Palace to win the Coronation Sidecar Race. The passenger (seated) is doing his best to stop the motorcycle from turning over as they travel round the course at a very high speed.

Needless Fatalities

The "drowning" season is at hand.

Once more the time of the year approaches when readers of the newspapers may expect to see reports, under more or less startling headlines, of casualties in water—stories of adults and children who have gone down for the third time, never to leave the water alive.

During the late spring, summer and early fall months, water will take its annual toll of victims in the prairie provinces. The pity of it is—and yet a consolation, too—that most of these deaths could have been avoided, for practically all drowning accidents can be tabulated within the scope of two categories, both of them to-day are avoidable, if the necessary precautions are taken.

Some people drown because they cannot swim. Others, who are able to swim, lose their lives in water because they are physically unable to stand the shock, and develop cramps which take the muscles and make it impossible for them to help themselves.

The obvious preventive of loss of life in the water by non-swimmers is to learn to swim. There is nothing difficult about that. Swimming is a comparatively easy art to acquire, though, it is true, some are more apt than others and as a result learn more rapidly than others how to keep themselves afloat in the water element.

It is not much use forbidding boys and girls to go down to the swimmer's hole to bathe. The lads and lasses cannot be blamed very much for attempting to seek relief from the torrid heat of the July and August sun in the cooling waters of the creek, the slough or the lake, whichever may be handy.

The boys which come from the healthful sports of bathing, swimming and diving should not be subjects of prohibition in a country where the season for such enjoyment is all too short and the opportunities for healthful recreation somewhat limited.

Instead of restriction there should be co-operation and assistance on the part of parents and teachers and every boy and girl should be taught to swim under proper supervision at as early an age as possible. In some of the tropical countries children are able to swim almost as soon as they can walk and equally as expertly. It would be almost impossible for the parents to learn to swim should be part of the school curriculum and once or twice a week during the summer months, after school hours or during the vacation, children should be taught to swim and enjoy the pleasure of bathing. If there is suitable water within reasonable distance, swimming should be as natural to the prairie child as walking and running.

As for swimmers who perish because they are not in physical condition to stand the shock of cold water, even they can be rendered immune. If recently reported discoveries of medical science are authentic.

A Rochester, Minnesota physician recently announced, as a result of research and experimentation, that he has discovered that many people are hypersensitive to cold and that this hypersensitivity can be cured in a simple and easy manner and without benefit of medical attendance or the use of drugs.

To discover whether one is hypersensitive to cold and therefore in danger of succumbing to shock in the water, all that is necessary is to immerse one's hand in ice cold water for a minute or two twice a day for three weeks period. If the hand swells under this treatment, it is a danger signal. The experimenter is liable to shock and drowning if he or she ventures into the water, according to this authority.

Fortunately the remedy is as easy and simple as the test. One can be cured by continuance of the hand immersion practice until the swelling disappears. Then, according to the Rochester doctor, the "patient" has become desensitized and may venture into the water without incurring any risk of drowning from cramps.

If there is scientific authority for this discovery, a combination of tuition in the art of swimming and desensitization of all who might be subject to cramps would cut down the loss of life from drowning to almost zero.

It is true that every year lives are lost because boats and canoes are upset and their occupants tilted into the water, but, best, if not all, lives lost as a result of this class of accident are due to the fact that either they are unable to swim or are overcome by the shock of cold water. If the former, the risk would have been avoided by learning to swim and if the latter, by the simple method of desensitization before running the risk of going afloat in any type of capable craft.

The risks of drowning under either of the two causes assigned are great to be ignored and all who embark either on or in the water should be secured in advance, because they have taken all the necessary precautions to avoid death for themselves and sorrow for their friends and relatives.

George VI. cannot speak German fluently, despite much family practice with a young man. His French is moderate.

Proposed Telegram To Movie Star
Cool Bearer \$212.85

The telegraph companies should cultivate the good will of Ray Francis, dark-haired screen beauty. She believes that a recent telegram she received is the longest telegraphed proposal ever sent a Hollywood star.

A Detroit advertiser, terming himself "well known nationally," dispatched a fervent 2,500-word telegram, which ran on over 22 telegraph forms. Miss Francis never did so much as sit at a desk to read it.

It cost him \$29.25 to get across his fantastic idea.

Speed Has Been Exaggerated

Germany's Rearmament Program
Will Take Some Time To
Complete

There is no doubt about the magnitude of Germany's rearmament program, but its speed has been exaggerated. So writes Hansom W. Baldwin in a Berlin dispatch to the New York Times. After some apparently exhaustive checking up with expert observers, Mr. Baldwin writes: "Despite contrary reports, Germany was not ready last year to fight a major war when her troops marched into the Rhineland; she is not ready to-day and she will not be ready next year. It will be 1933 or 1934 at least, it is believed, before she can hope to complete training the vast reservoir of some 6,500,000 untrained men who had no experience with conscription between Versailles and Hitler. It will be two or three years at least before Germany, although straining every nerve, can pile up the reserve equipment needed for a mass army and can supply sufficient officers to command that army."

But Germany will fight sooner, if the Times correspondent concludes, if necessary steps to fight "every one of her active units at full strength and in war cannot be made ready instantly," and "she can't today give any nation a scrap far more vicious than it would enjoy and she could have done so yesterday."

It is the correspondent's opinion, however, that at the time of Rhineland occupation, Germany would have been beaten. If France "had taken positive measures," and that "Germany would probably have today if France were her only opponent."

The Times' observer, however, does not minimize the preventive effectiveness of Germany's vast rearmament program. Germany has a reservoir of man power "that France does not possess and which Britain, without conscription, cannot utilize," and Germany is constantly drawing untrained men from that reservoir and turning them into soldiers—Buffalo Courier-Express.

Boy Scouts

Brassbands Attended During
Reported At Annual Meeting

Increased membership and broadened activities during 1930 were reported at the annual meeting of the Canadian general council of the Boy Scouts Association.

The general council, Lord Tweedsmuir, as chief scout, presided, and Sir Edward Beatty, president of the association, and representatives from all parts of Canada were present.

The total membership was reported at 65,546, an increase of 5,545.

As in previous years Ontario showed the highest membership, with 31,585. Saskatchewan reported 8,650, Alberta 6,832, Manitoba 7,111, and British Columbia 6,881.

Roses Along Railway Line

Stretch In New York State Said
Not At Hand

The ramble rose which line many miles of New Haven tracks in four States are all taken from a deep cut at Mount Vernon, N.Y. They were planted there in 1909 at a cost of \$5,000. Since that time annual cuttings and transplanting have been made so that there are now 57,000 bushes along the line, reports The Mutual Magazine.

The 11-mile stretch between New York and South Norwalk is practically a solid mass of these roses. Besides beautifying the right-of-way their roots materially retard soil erosion in the cuts.—New York Times.

In its journey around the sun, the earth travels at the rate of 1,112 miles a minute.

Bones of 2,000 hippopotami, killed by prehistoric hunters, were found in a single cave in Sicily.

There are 1,024,000 persons by the name of Johnson in the United States.

There is only one ship in Ecuador's navy. Five in Mexico's and 14 in Peru's.

DO YOU NEED A BUILDER?
WHEN you are making up your mind to build a good house, you need a good builder. You need a man who is not only a good builder, but a good man.

Robert W. London, Ont. who has built for me the best house I have ever lived in, is a good builder and a good man. He is a man who is not only a good builder, but a good man.

Robert W. London, Ont. who has built for me the best house I have ever lived in, is a good builder and a good man. He is a man who is not only a good builder, but a good man.

All's well with the roll-your-own who rolls his own with Ogden's Fine Cut. Always fragrant, always cool, the kind of cigarette tobacco that steers you straight down the highway to real enjoyment. Try Ogden's and choose the best paper—"Chanticleer" or "Vogue".

Poetry Competition

Westerners Receive Honorable Mention In Contest Conducted By Montreal Authors' Association

Two Toronto winners were announced as first prize winners in the 1927 poetry competition conducted by the Montreal Authors' Association.

Mary I. Woodworth, Toronto, was named winner in the lyric poetry class, for her "April".

The other Toronto winner was Edna Alice Boyd, who led the lyric poem division with "Vignette of a Heron."

Honorable mention in lyric poetry was given Joseph Garvey of Larder Lake, Ont. for "The Transient." Among those commended were Alexander Brown, Victoria, for "Borealis," and A. Baxter, of London, Ont. for "The Murex."

Honorable mention in the lyric poem class was given to "The Voice," by Bernard Richards, Alhambra, Alta.; "Gale Gull," by Mrs. McNeill, Chater, Vancouver, and Grace Hewlett, Westbank, B.C.

SELECTED RECIPES

GRANDE DELIGHT
1 cup cracked malt
3 tablespoons Benson's Corn Starch

Five grains malt
1 cup cold milk
1 egg yolk
1 cup Crown Brand Corn Syrup
1 cup orange juice
1 tablespoon lemon juice
1 teaspoon orange rind, grated
1 egg white
2 tablespoons fine fruit sugar

Boil milk in top of double boiler. Mix Benson's Corn Starch and milk with cold milk; add slowly to hot milk, stirring constantly until thick. Cover and cook 15 minutes, stirring occasionally. Combine egg yolk and Crown Brand Corn Syrup; stir and add to hot mixture. Continue cooking for three minutes. Add orange juice, lemon juice and grated rind. Stir and remove from heat.

Four slowly over a heavy fire until the mixture is thick. Pour into mould and chill well before serving.

Both Are Centenarians
Egyptian Cossus Discovered And Daughter Over 140

The world's oldest living couple, a mother and her daughter, were "discovered" in a village of lower Egypt during the Egyptian census being carried out. The mother, Hitt, is 147 years old, and her daughter, Mousharraf, is 107. Even though they are so old, they are still very active and their skin looks like that of a young woman.

The census officer, who was called upon to take about Hitt's campaign in Egypt.

The number of sheep and lambs on Canadian farms is approximately 2,028,560.

The heart of a normal adult pumps about one gallon of blood a minute.

Extend Invitation

Rover Scouts Invited To Hold Next International Gathering In Canada

Rover Scouts from all over the world will be invited to hold the next international gathering, or rover meet, in Canada, in the summer of 1930. Announcement was made at the meeting of the executive committee of the Canadian general council of the Boy Scouts' Association. The location of the proposed rover meet camp has not yet been decided.

The invitation will be presented through the international bureau at imperial headquarters of the Boy Scouts' Association, London. It is understood Poland also is making a strong bid for the meet. The last international rover meet was held near Stockholm, Sweden, and was attended by 2,000 rovers from 24 countries. Canada was represented by a rover patrol of seven.

The Checkers are the only Indians to have literature recorded in an Indian language. Squagah, a Cherokee inventor, worked out this alphabet in 1821.

Seventy-one per cent. of the meals eaten by Americans are eaten outside of homes.

Because of gravity, a grandfather clock in Spitzbergen needs a longer pendulum than one at the equator.

YOUR
LITTLE SAVINGS...
FINANCE
MORTGAGE LOANS

TENS of thousands of Canadian farms and
 homes benefit from first mortgage loans
 made possible by the accumulated savings of
 Life Insurance policyholders.

For every borrower, there are six thrifty
 people who supply the necessary funds.

This fact affords a striking illustration of
 the "double duty" performed by Life Insurance
 dollars. Not only do they ensure financial
 security for the men, women and children of
 Canada, but they also help to build and finance
 their farms and homes.

Life Insurance companies exercise the
 greatest care in the selection of properties
 upon which mortgage loans are made. To
 safeguard the savings of policyholders, security
 of principal and interest is and must always be
 the first consideration.

Make Home In Trailers

Thousands of People in U.S. Live in Moveable Homes

The prophets in the United States are started to find that facts have outrun their predictions. They failed to forecast that in 1938 there would be over four hundred factories producing trailers and that 300,000 people would make homes in trailers. They try to catch up by prophesying that within thirty years—some say within twenty years—half the people in the country will dwell in this form of moveable house.

One advantage of the trailer is said to be that it is a means of escaping taxes. The process is very simple; the trailer-dweller moves his dwelling into another tax jurisdiction. If this opportunity were open to everybody, not merely fifty per cent. of the population of the United States but one hundred per cent. of the people on earth would take to the trailer. Such a prophecy may be justified by figures, but it will hardly square with conditions that are easily imagined. The trailer tax would avoid the city tax collector, but suppose that the city tax were added to the gasoline levy, then what?

Besides, what about fashion? No doubt the trailer is a common subject of conversation in the United States. That means that, just as those who can afford it now take pride in making their houses a little finer than those who can't, they will better dwell in shacks in the slums, as class distinctions based on wealth will manifest themselves in the trailer. The house-dweller can choose a site wholly apart from the slum. Even when he travels, he may have a Pullman car or even his private railway car. But the shiny trailer of the millionaire must run on the road with the dingy trailer of the modern pygmy. This suggests many problems but no ways to solve them.

Everything considered, it will probably be well for the prophets not to bet too high on their forecast for the in trailer business.—Ottawa Journal.

Drake's Brass Plaque

In 1678 He Claimed For Queen Elizabeth What Is Now California

In 1677, commanded by Queen Elizabeth to "sally the King of Spain in his India," red-headed little Francis Drake put out from Plymouth in the Golden Hind, called the Magellan Strait, went plundering up the west coast of the New World. Later with Spanish treasure he pushed north in search of an Arctic passage back to England. One day in the Spring of 1578, he sailed into a "convenient and fit harbor" somewhere near the future site of San Francisco. There he received the homage of native Indians and, according to his chaplain's account, nailed to a "fair great post" a brass plaque claiming the name of "Albion" in the name of Her Majesty.

Then Francis Drake sailed on west round the world, and his plaque vanished into thin air. Motoring near San Rafael, about 14 miles north of San Francisco, one day last summer, one Bryce Blair, a doctor, decided to stop for a picnic lunch on a nearby grassy bluff. Mr. Blair squatted, found himself on a rock, lifted it, saw a dingy piece of metal. It rubbed off the dirt, managed to dig the word "Drake," took his find to University of California's History Professor Herbert R. Bolton.

Last week the historian announced himself satisfied that it was indeed the chain plate posted by Drake 317 years ago. Brought to the California Historical Society for a reported \$2,000, the plaque will be presented to University of California, where where all who pass may read:

See it known unto all men by this sentence, June 17, 1578, by the grace of God, the name of Her Majesty Queen Elizabeth of England and Her Successor forever I take possession of this Kingdom, whose king and people freely recognize their right and title in the whole land unto Her Majesty keeping ever named by me as to be known unto all men as Nova Albia. Francis Drake.

From the Magazine Time

Men For Bridge Players

The Bulletin of Bridge is one of the world's best bridge players through a novel system which has established by rapid progress. In order to eliminate the annoyance and difficulty of guessing which cards are held by his opponents, his dealer was an "assistant" who walks around the table after each deal and gets this information for him—Col. Gies.

REHEARSING FOR THE ROYAL TOURNAMENT

The 16th Lancers rehearsing for the Royal Tournament on Hounslow Heath. This famous unit of the British Army is noted for the excellence of its horsemanship.

Plains of Abraham

Historic Battleground in Quebec Named After An Early Settler

There are few boys or girls in Canada or the United Kingdom and even in other parts of the British Empire, for that matter, who have not heard of or read of the Plains of Abraham, where in now located Quebec's beautiful Baitfield Park, and where was fought the final, glorious struggle between General Wolfe and Montcalm which added Canada to the Empire.

It may be of added interest, however, to explain that the Plains or Heights of Abraham are named after a pioneer settler named Abraham Martin, who on December 4, 1650, received a grant of land from the Company of New France. The ground in question was situated between what are today St. Genevieve and Claire Fontaine streets.

Martin apparently used the land for pasture, and his cattle wandered over a larger area of land than that granted to him, and, as a result, the whole of the land in the vicinity became known as the Heights of Abraham.

On September 13, 1759, when the fate of the French regime in Canada was practically decided, and both Wolfe and Montcalm fell mortally wounded, the French line of battle was formed on part of the land originally owned by Martin.

A monument to the memory of Abraham Martin, erected by the C.P.R., stands on the Louise Debutment near the immigration building. — Quebec Chronicle-Telegraph.

More Motor Cars

Production of Motor Vehicles Up For First Three Months Of This Year

Production of motor vehicles during the three months ending March 31 showed an increase of almost 20,000 over the corresponding period in 1936. The Automobile Bureau of statistics reported, Sales of automobiles showed an advance of 64 per cent. in number and 61 per cent. in value over the first three months of 1938. Automobiles produced in the three-month period totaled 64,181, compared with 44,091, output of passenger cars totaled 46,737, a gain of 31,350, and commercial cars produced comprised 17,444, an increase of 7,445.

Sales of new motor vehicles totaled 37,287 at \$37,786,380 against 22,745 at \$23,531,785 in the first quarter of 1936. Passenger car sales totaled 30,718 at \$31,081,378 against 18,848 at \$19,131,182, and trucks and buses added amounted to 6,666 at \$4,769,010 against 4,337 at \$4,448,530.

The Last Straw

A Frenchman was relating his experience in studying the English language. He said: "When I first discovered that I was quick, I was fast. If I spent too freely I was fast, and that not to eat was fast. I was discouraged. But when I came across the sentence, 'The first one who uses one-dollar bill, I gave up trying.'"

"Look out for the car of tomorrow" suggests the editor of a motor magazine. "Study the car, you please, not bother us; we're too busy dodging the car of today."

Most Eskimos spend their winters in shabbed huts. Very few live in igloos.

We'll all manufacturers—making good, making trouble, or making excuses. —3701

Value of Farm Products Up

Reached Billion Dollar Mark For First Time Since The Depression

Value of Canadian agriculture products topped the billion dollar mark in 1938 for the first time since the depression hit the country's basic industry in 1930. It was shown recently by the Dominion bureau of statistics. The gross value of farm products was placed at \$1,061,524,000, an increase of \$12,084,000 over 1935. It was \$294,650,000 higher than the depression low year of 1931, representing a gain of 38.4 per cent. Every province was represented in the 1938 gain over 1935 and practically every farm product.

The bureau estimated the net value of farm production in 1938 to be \$651,077,000 which again was the best year since 1930. The net value was calculated by deducting from the gross value estimates of the value of those portions of the crops used for seed and for live stock feed. The figure therefore represents the value of products raised on the farm which are available for sale to the farm or for consumption by the farmer and his family.

It was estimated the capital value of Canadian farms reached \$4,528,376,000 in 1938, a drop of \$84,000,000 from 1935. The decrease was due to falling land values in Quebec, Manitoba, Saskatchewan and Alberta.

Substitute For Spinach

If the children don't like spinach, there's no need for a family car. Home economics experts in the United States government department suggest trying other greens instead. They list beet tops, chard, dandelion, greens, mustard greens, turnip tops and watercress as "quite as good for vitamins" and often richer in calcium and iron.

England published a total of 25,028 books, including new books and reprints, during the 1938. Of this number, 4,531 were fiction.

Within the last 100 years, it was a common practice in some regions of France to bind a child's head to give it a long, sugar-bell shape.

Your opponent insists on a duel with pistols at fifty paces.

"I agree to the fifty paces, but I suggest swords."

—The Illustrated Mail, Frankfurt.

Man Is Cruel Killer

Inflicts Greatest Amount of Suffering On Wild Animals

Wynton Davis Hubbard in an article in Chambers's Journal says it is a common experience to read of or listen to talk of the horrid savagery of life of wild animals and their constant race-to-face combat in killing and gruesome. Yet I do not think wild animals live in constant terror. They are barely alert at all times, but not necessarily afraid. They are not always imagining what death awaits them. When death does come it is usually swift. The moment of terror is brief.

It is not true that the greatest suffering wild animals are subjected to is inflicted upon them by men. Of all the killers we are the most cruel and most rapacious. There is no limit to the things men will do. We shoot and cripple animals and have them to wonder off and suffer from terrible wounds.

We pitfall them and allow them to struggle for hours, or trap them by the leg or neck.

Can you imagine stretch out to picture a man waiting among herds of game without causing an instant stampede in every direction? Lions have been observed to do this. Several hunters have reported seeing lions waiting back from water and passing close to them, feeding antelope without causing any great excitement.

The greatest reason to give the killer less pleasure and they watch him curiously. But they do not run as they would if a man appeared. The lion, great, hard to find, alone kill only when hungry or at bay. Man kills at every opportunity and by every means within his power.

Pre-View Of Solar Eclipse

Coming Event Shows At After Planetarium In Chicago

A dress rehearsal for the coming eclipse of the sun ended in Chicago the other day before it started. The Adler Planetarium decided to show, with the aid of its star machine and artificial sky, just how things will look on June 8—on June 9—on June 10—on June 11—on June 12—on June 13—on June 14—on June
